Transparent Network Turnover Calculation

SALES TURNOVER CALCULATION FORMULA

Your network's sales turnover is based on the value of bots purchased by your partners at different levels within the structure. A percentage of each sale is added to your team's total turnover **depending on the level:**

1ST LEVEL –

100% of Sales

Partners you personally recruit contribute 100% of their bot purchase value to your turnover.

Example: You invite a partner who buys a bot for \$1,000. Your turnover increases by \$1,000.

2ND LEVEL –

50% of Sales

When your 1st-level partner recruits new members, 50% of their bot purchase value is added to your turnover.

Example: Your partner invites a new member who buys a bot for \$1,000. Their turnover increases by \$1,000, while \$500 is added to yours.

3RD LEVEL –

25% of Sales

When 2nd-level partners recruit new members, 25% of each bot purchase is added to your turnover.

Example: A 2nd-level partner recruits a new member who buys a bot for \$1,000. Their turnover increases by \$1,000, and \$250 is added to yours.

4TH LEVEL & ABOVE –

10% of Sales

From the 4th level and beyond, 10% of the bot purchase value contributes to your turnover.

Example: A 3rd-level partner recruits a new member who buys a bot for \$1,000. Their turnover increases by \$1,000, while \$100 is added to yours.

THE MORE ACTIVE YOUR TEAM, THE FASTER YOUR TURNOVER GROWS—DIRECTLY INFLUENCING YOUR CAREER STATUS AND BONUSES
